

- The layout and UI style of the application

- When application starts up, there are initially some data items in the combo box. When information is chosen in the combo box, the related information is shown in the text box at right hand.

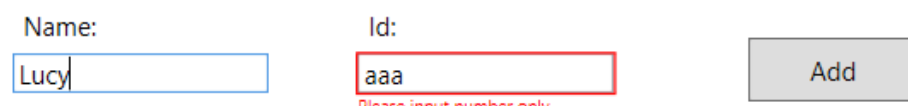

- Name and Id text boxes receive input information literally, which will be appended to combo box after clicking "Add" button. "Add" button is initially disabled, or greyed.
- After input somethings both in Name and Id text boxes, the "Add" button will be enabled.

- After clicking "Add" button, the input information will appended to combo box, and the input text boxes will be cleared.

- We will add validation to what you have input in the Id text box, which accepts digits only. If you enter non-digit information and try to "Add" this to combo box, the "Id" text border will show red to alarm the invalidation of input. Invalidated input will not be accepted, nor be appended to combo box.

Name:

Lucy

Id:

aaa

Please input number only

Add
